Panasonic recommends Windows Vista® Business.

As the long-standing market leader for robust and reliable mobile devices, we have now developed the new Toughbook CF-H1 in close cooperation with existing customers and the Intel Digital Health Group. This Mobile Clinical Assistant is the first of its kind in the world with the high-performance Intel® Atom™ Processor and has been perfectly designed to meet the requirements of nurses and physicians to access and document up-to-date patient information at the point of care or while on the go. "I consider the development of the MCA as extremely important. I am delighted that Panasonic valued the contribution of nurses to develop a hardware which supports nursing staff in their practice", says Barbara Stuttle CBE, National Clinical Lead for Nursing. With its fanless design and sealed ports the CF-H1 is easy to disinfect and meets Hospital Safety Certifications*. The CF-H1 MCA allows doctors and nursing staff to benefit from instant access to medical records, accurate documentation of patient conditions and medication and subsequently leading to higher operational efficiency for Healthcare Professionals.
