AllVue Xtreme (LED)***			X	50% Brighter than CCFL Version
Dual Mode AllVue Xtreme (LED)***			X	60-200% Brighter than CCFL Version

\* This product is End of Life.

\*\* The Dual Mode AllVue Plus has increased light transmission over the previous version of the Dual Mode Allvue technology: 70% versus 40%; this translates into a brighter screen.

\*\*\* Xplore LED displays enable higher brightness than CCFL without increases in power consumption or internal heat generation; also provides for a larger brightness adjustment range.
