

Spirit Label-it™

A highly effective and affordable barcode labelling solution

Overview

Barcodes are now used throughout every stage of the supply chain, and have become an integral part of everyday business life. We have therefore developed Spirit Label-it™, a low cost, entry-level application that enables you to print linear barcode labels quickly and easily. We can provide a range of options, right through to a high level professional version.

Spirit Label-it™ can be used with a mobile device or desktop PC. The data to be encoded can be read from source or entered on demand. It can be linked to a database, using WLAN or Bluetooth communication, and can be implemented as part of a larger mobile application.

The higher level software incorporates a versatile but easy to use label design capability, which can incorporate the barcode, text and graphics/images. Labelling data can also be imported from text files and from Microsoft Excel or Access. This all makes Spirit Label-it™ a great choice for any barcode labelling application.

Key hardware/software

Spirit Label-it™ is available as a complete kit, which includes the host PC software application, the mobile application and the mobile device. The mobile device can be chosen from one or more of a range of associated hardware options. These include:

- A rugged tablet PC
- A compact Personal Digital Assistant (PDA)
- A powerful handheld mobile computer
- A versatile mobile printer

Key benefits

By providing a range of Spirit Label-it™ solutions, we are able to offer you a system that will meet your specific labelling needs and budget. The benefits available with our solutions include:

Highly flexible – options range from a single barcode symbology through to multiple linear codes

Very affordable – prices start from just £9.99 for a single barcode format

Simple to use – no knowledge of barcode printing technology required

Feature-rich – our offerings incorporate a wide choice of labelling and label design functions

Easy integration – dynamic barcodes can be integrated into Pocket PC, Windows® CE .NET and desktop PC (Windows® XP or Vista) applications.

Key features

Straightforward set-up

Our solution is easy to install and use: it will effectively work straight from the box. It is flexible and pre-configurable and offers both batch and wireless communication options. A complete software development kit is also available.

Ease of use

Spirit Label-it™ is easy to use: all you need to do is type in the number or name you want to encrypt, along with the specific symbology you've chosen, and it will print out the barcode label. It will even automatically adjust it to fit the size of label chosen. You can choose any linear symbology. If required, multiple linear symbologies can be used within the same label.

Extensive hardware support

Spirit Label-it™ supports laser, inkjet and mobile printers; handheld mobile devices; and desktop PCs. It will print to any Windows printer (including laser and thermal versions) that supports graphics. Images in bmp, gif, jpeg, wmf and pcx formats are all supported for use on labels.

PC and mobile device – minimum specification

Client PC		Mobile Device	
Processor	800 MHz Minimum 1 GHz recommended	Processor	ARM (v4 etc) Intel (Bulverde etc) and most other standard chipsets
