

Spirit Trackit™

The effective way of keeping track of your assets

Overview

Keeping track of your assets can be a time-consuming, complex and expensive business – but this is information that is essential and needs to be readily accessible at all times. However, manual paper-based asset tracking systems are inefficient, labour-intensive and unable to provide real-time data.

We have therefore developed Spirit Trackit™ – a highly effective asset management system that ensures that you always have instant access to the latest information about the location, quantity, age and value of your assets. An integral part of the system involves each asset item being given its own unique identification.

Our system enables you to track and monitor assets between multiple sites and third party locations, and includes a comprehensive reporting package. This will all help to streamline your management processes and underpin the smooth running of your business.

Key hardware/software

Spirit Trackit is available as a complete kit, which includes the host PC software application, the mobile application and the mobile device. The mobile device can be chosen from one or more of a range of associated hardware options. These include:

- A high performance barcode scanner
- A rugged tablet PC
- A compact Personal Digital Assistant (PDA)
- A powerful handheld mobile computer
- A versatile mobile printer
- Spirit Label-IT software for printing asset labels

Key benefits

The extensive capabilities available with Spirit Trackit™ enable you to keep your assets under tight control. Our solution offers a variety of benefits, including:

Time and cost savings – much faster, less labour-intensive and more reliable than a manual system

Improved management – instant access to details of your assets and their location

Enhanced security – through each item having its own unique identity

Insurance assurance – up-to-date records enable you to maintain the correct cover for your assets

Greater efficiency and productivity – by streamlining process, eliminating paperwork and improving service levels

Faster audits – through access to instant and accurate asset information

Better inventory tracking – along with the ability to track the movement of assets between different sites

Increased accuracy – because each asset has its own coded identity, this helps to eliminate manual input errors

Key features

Comprehensive reporting

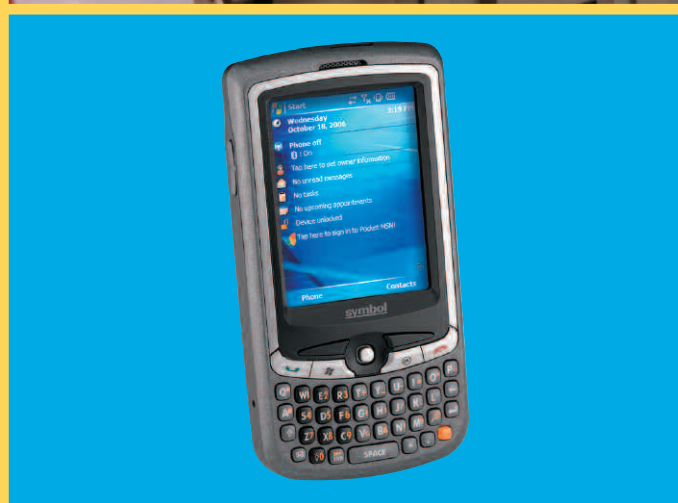

Spirit Trackit™ offers a full range of management reports, including maintenance reports, and assets classified by employee, type, cost and location. You can also create planned maintenance reports, and track items that are being repaired etc.

Easy set-up

This solution is easy to install and use and is designed to work straight from the box. It offers everything you need to keep close track of your assets, including a versatile printer. The solution is completely user-definable and can be easily configured to meet your changing business needs.

Rapid updating

You can manage any move, addition or change requests rapidly from your mobile device. Details and configurations of your assets can be easily and quickly updated whenever necessary.
