

- Would you like a simple but effective stock taking system?
- Do you need to track items and create reports?
- Do you want a stand alone paperless system, without the need for expensive IT infrastructure?

Spirit's 'StockIT' solution has been developed specifically for small businesses that need an easy, affordable but full stock taking system.

A straightforward but versatile solution

StockIT is the ideal solution if you want to upgrade from a basic stock taking approach (such as spreadsheets) to a more efficient and comprehensive system that is also very cost-effective.

Our product includes:

- **A rugged PDA** – complete with fully loaded software
- **A mobile printer** – with 1,000 labels
- **An installation guide** – and a user guide

Making it happen

StockIT has been designed for a single user on a single PC. To run the solution, you will need:

- A PC with a Windows XP operating system or higher
- ActiveSync on Windows XP or Windows Mobile Device Center on Windows 7

Other features include:

- Information can be entered from a spreadsheet or pen and paper.
- The data will be displayed in a spreadsheet, in columns that can be updated on the PC or the mobile device
- Stock entry options include barcode, make, model, price, location, amount of stock and the description. You can also search for and view stock; and modify or delete a stock entry.

The benefits

The benefits of StockIT include:

- **Simplicity and speed of deployment** – StockIT is easy to use: all you need is a PC. Our solution comes as an ‘off the shelf package’ – there is no development time involved.
- **Value for money** – The system is inexpensive and avoids the need for a costly infrastructure and extensive training.
- **Versatility** – StockIT provides full traceability of all your stock and assets, along with easy reporting functionality.
